

## Luxury. Style. Sophistication.

Large, vibrant Town & Country signature flames actively dance over the “invisible” burner of the new WideS54 See Thru to perfectly divide architectural space.

The WS54 See Thru features a completely illuminated burner, adding dynamic injections of up-light through the sparkling Diamond media and subtle downlight over tranquil stone and sand. With Town & Country’s unmatched power venting versatility, the WS54 See Thru can be located almost anywhere within a building envelope - even 110’ from an outside wall - and in peninsula installations.
